## REV AVID

### REV STUDENT INTERVIEWS

We decided to interview an AVID student and a non-AVID Student to see if their future plans differed in any way. The non-AVID Senior, has applied to U of R and a school in Denver. He applied to the U of R because his relatives work there and he can get a discounted tuition. The hardest part of applying to college was not having the correct tools and guidance in filling out the applications. He hopes to get into these colleges and if not, he is going to apply to a job.

The AVID Senior applied to 14 colleges, some out of state and one was in the IVY League. As of right now, she has been accepted to two out of the fourteen colleges. She has also applied to many scholarships to pay for her education. Her goal is to attain her Bachelors of Science degree in Biology. AVID has expanded her options on colleges, majors, and career opportunities.

Annie Castro interviews Katrina Galvan on her journey through the college application process.

### FAFSA Application

The FAFSA application is now open so hurry and submit before February 1st. Submitting before the deadline will allow time to fix mistakes. Visit [www.fafsa.ed.gov](http://www.fafsa.ed.gov) to start your application.

AVID Tutor and nursing student Jay Chae leads a biology review session at the Study-a-thon.

Dylan Miars, an AVID sophomore, and Nick Bracken lead study sessions in integrated math.

### AVID Study-a-thon

The AVID study-a-thon is an opportunity for students to get extra help in preparation for their finals. The students go to the study-a-thon on a Sunday afternoon or after school and they get help from their teacher or an AVID student on the subject they are concerned about. All math, science and Spanish subjects are available to students and many students are thankful for all the extra help they receive.
